👤 PROFILE

🔑 Skilled software developer with experience in building scalable web and native applications using React and its ecosystem, passionate about the Web3 space.

📁 EMPLOYMENT HISTORY

Software engineer (frontend) at Input Output, Remote

March 2022 — April 2024

As part of an agile scrum team, I worked as a front-end software engineer on ideating, designing and developing a DevOps tool, a sandbox tool for issuing and verifying verifiable credentials, and a browser wallet.

Key responsibilities and contributions:

- Led the front-end development of the web tools;
- Reviewed code contributions from team mates, ensuring code quality;
- Contributed to each step in the process of development, from ideating to real-thing agent infrastructure provisioning tool;
- Developed a reusable react component library for the designs given;
- Worked closely with the UI designer to develop the best UI/UX possible;
- Contributed to the wallet SDK;
- Developed and maintained the atala PRISM main website;
- Contributed to the development of PRISM agent documentation website;
- Maintained the legacy browser wallet extension;

Full-Stack Developer at FinerVision, London

February 2020 — February 2022

As part of a small agile team of full-stack developers, I worked on several small to medium sized web projects and medium sized native apps for different clients such as Sainsbury's, HSBC, Teva and other.

Key responsibilities and contributions:

- Contributed to a few native apps using React native and Expo;
- Collaborated with some clients directly, to ease the development process and help the team;
- Contributed to resolving complex app data migration issues;
- Transformed designs into pixel-perfect responsive and functional code;
- Automated content integration into apps using Google APIs;
- Delivered timely ahead of project deadline most of the time;
- Supported team mates fixing bugs & helping them meet the deadline;
- Equipped virtual machines with the necessary software for web services;
- Maintained legacy projects and fixed bunch of bugs;
- Developed numerous bespoke designed emails;

EDUCATION

Self-taught

Completed various online courses on platforms such as Udemy, Pluralsight and freecodecamp, and studied on other online resources such as Mozilla Developer Network and from these two open-source books:

- "[The Rust Programming Language](#)" by Andrew Hunt and David Thomas
- "[Mastering Bitcoin: Programming the Open Blockchain](#)" by Andreas M Antonopoulos & David A. Harding
